

PRIYANSHU PANWAR

AWS Cloud Engineer | DevOps Engineer | Site Reliability & Platform Engineering

Greater Noida, UP, India | +91-7078041562 | priyanshupanwar841@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner with hands-on experience across the AWS cloud ecosystem (EC2, S3, IAM, VPC, CloudWatch), container orchestration with Docker and Kubernetes, and Infrastructure as Code using Terraform. Skilled in building CI/CD pipelines with GitHub Actions and Jenkins, automating cloud deployments, and applying Linux, Python, and Bash scripting to infrastructure automation. Strong foundation in networking, cloud security (IAM), monitoring/logging (CloudWatch), and scalable, high-availability system design through applied cloud projects. Seeking an entry-level AWS Cloud Engineer, DevOps Engineer, or Site Reliability Engineer role.

TECHNICAL SKILLS

Cloud Platforms: AWS — EC2, S3, IAM, VPC, CloudWatch (hands-on); Route 53, Auto Scaling, ELB (conceptual)

Containers & Orchestration: Docker, Docker Compose, Kubernetes (CKAD), Nginx Reverse Proxy

Infrastructure as Code: Terraform — modular configurations, automated provisioning, multi-environment setup

CI/CD & Automation: GitHub Actions, Jenkins, Git/GitHub, Bash Scripting, Python

Operating Systems: Linux (Ubuntu, CentOS)

Databases: MySQL, PostgreSQL, MongoDB Atlas

Networking: Cisco Packet Tracer, TCP/IP, DNS, HTTP/HTTPS, SSH, VPN, Load Balancing, Firewalls, Network Security, Routing & Subnetting

Additional: Full-Stack Development — React.js, Next.js, Node.js, Express.js, REST APIs

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** — Certified in AWS Cloud fundamentals, IAM, security, and cloud infrastructure.
- **Certified Kubernetes Application Developer (CKAD)** — Pearson / Coursera Kubernetes, Container Orchestration, Application Deployment.
- **Terraform on AWS: From Basics to Guru** — Pearson / Coursera Infrastructure as Code (IaC), Automated Provisioning.
- **Docker for Beginners with Hands-on Labs** — KodeKloud / Coursera Docker, Containerization, CI/CD Fundamentals.
- **Connect and Protect: Networks and Network Security** — Google / Coursera Networking, Network Security, DevOps Fundamentals.
- **SQL for Data Science** — UC Davis / Coursera SQL, Data Pipelines, Cloud Data Processing.

PROJECTS

Fluent AI — Cloud Deployment Platform

AWS EC2, Docker, Docker Compose, GitHub Actions, Nginx, MongoDB Atlas

- Containerized a full-stack AI application (Next.js, Node.js, MongoDB Atlas) using Docker and Docker Compose, and deployed it to AWS EC2 behind an Nginx reverse proxy for production-ready cloud hosting.
- Automated build, test, and deployment workflows with GitHub Actions CI/CD, enabling zero-downtime releases and centralized environment variable management.

Enterprise DevOps CI/CD Automation Pipeline

Docker, Jenkins, Kubernetes, AWS, GitHub Actions

- Designed an end-to-end CI/CD pipeline using Jenkins, Docker, and Kubernetes to automate testing, container image builds, and rolling deployments across environments.
- Implemented infrastructure monitoring and alerting workflows supporting automated rollbacks and zero-downtime production releases, improving deployment reliability.

Multi-Cloud Infrastructure Automation Platform

Terraform, AWS, Docker, Kubernetes, Linux

- Built modular, reusable Terraform configurations to provision AWS cloud infrastructure, automate container deployment, and standardize environment setup across projects.
- Authored Linux automation scripts and reusable Kubernetes manifests, reducing manual infrastructure provisioning effort and ensuring environment consistency.

Telecom Customer Churn Prediction Platform on AWS

AWS EC2, S3, IAM, CloudWatch, Docker, GitHub Actions, Python, Scikit-learn, SQL, React.js

- Built and deployed a cloud-hosted churn prediction platform analyzing 243,000+ telecom customer records, using Python, SQL, and ML models (Random Forest, Logistic Regression) to predict churn risk.
- Containerized the application with Docker and deployed it on AWS EC2; used Amazon S3 for dataset and model artifact storage, IAM for access management, and CloudWatch for application and infrastructure monitoring.
- Automated testing, image builds, and deployments with GitHub Actions CI/CD, and built a React.js dashboard for real-time churn analytics and business insights.

EDUCATION

Master of Computer Applications (MCA), Data Science

Bennett University, Greater Noida, UP — Pursuing, 3rd Semester

2025 – 2027

Bachelor of Computer Applications (BCA)

Maa Shakumbhari University, Saharanpur, UP

2022 – 2025
