

PRIYANSHU PANWAR

AWS Cloud & DevOps Engineer

Greater Noida, UP, India | [+91-7078041562](tel:+91-7078041562) | priyanshupanwar841@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner with hands-on experience in AWS Cloud, Docker, Kubernetes, Terraform, CI/CD pipelines, and cloud infrastructure automation through academic and personal projects. Skilled in Linux, Python, SQL, networking fundamentals, and Git/GitHub. Experienced in deploying and managing containerized applications on AWS and implementing automation workflows using modern DevOps tools. Additionally, possess full-stack MERN development experience with production-deployed applications. Seeking an entry-level AWS Cloud Engineer, DevOps Engineer, or System Engineer role.

TECHNICAL SKILLS

Cloud & Infrastructure : AWS (EC2, S3, IAM, VPC, CloudWatch), Terraform, Linux (Ubuntu/CentOS)
Containers & Orchestration : Docker, Docker Compose, Kubernetes (CKAD), Nginx Reverse Proxy
CI/CD & Automation : GitHub Actions, Jenkins, Git/GitHub, Bash Scripting, Python
Databases : MySQL, PostgreSQL, MongoDB Atlas
Networking : TCP/IP, DNS, HTTP/HTTPS, SSH, VPN, Load Balancing, Firewalls, Network Security, Routing & Switching, Subnetting
Web Development : JavaScript, React.js, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs, JWT, Postman

CERTIFICATIONS

AWS Certified Cloud Practitioner	Check (Apr 2026 — Apr 2029)
Docker for Beginners with Hands-on Labs	Kode Kloud / Coursera
Certified Kubernetes Application Developer (CKAD)	Pearson / Coursera
Terraform in AWS from Basics to Guru	Pearson / Coursera
Connect and Protect: Networks and Network Security	Google / Coursera
SQL for Data Science	University of California, Davis / Coursera

PROJECTS

Fluent AI Cloud Deployment Platform [Docker, AWS EC2, GitHub Actions, Nginx, Docker Compose](#)

- Containerized and deployed a complete AI application using Docker and Docker Compose with Next.js, Node.js, and MongoDB Atlas on AWS EC2 with Nginx as a reverse proxy.
- Set up CI/CD automation with GitHub Actions for automated image builds, testing, and zero-downtime deployments along with environment variable management.

Enterprise DevOps CI/CD Automation Pipeline [Docker, Kubernetes, Jenkins, GitHub Actions, AWS](#)

- Built a robust DevOps pipeline using Docker, Jenkins, Kubernetes, and AWS for automated testing, container builds, and rolling deployments.
- Set up infrastructure monitoring, alerting, and delivery workflows for production, enabling automated rollbacks and zero-downtime releases.

Multi-Cloud Infrastructure Automation Platform [Terraform, Docker, Kubernetes, AWS, Linux Scripting](#)

- I created Terraform setups that're easy to use and work in parts to automate setting up the cloud putting containers in place and setting up environments. This helps across AWS setups.
- I made scripts for Linux that do things automatically. I also made Terraform parts that can be used again and again and templates, for Kubernetes instructions. This helps to cut down on the time spent setting up infrastructure by hand.

Namaste Jobs — Full-Stack Job Portal [Live Link](#) [Next.js, Node.js, Express.js, MongoDB, JWT](#)

- I built a job portal from scratch. It has a login system that uses JSON Web Tokens. The portal also has roles for users, like admin or job seeker. I added a feature to filter jobs by category. The website looks good on all devices.
- I put the portal online using Vercel and Render. I connected it to a MongoDB Atlas database to store data. For testing the portals features I used Postman. I used GitHub to keep track of changes and automate the deployment process.

EDUCATION

Master of Computer Applications (MCA) – (2025–2027) [Bennett University, Greater Noida, UP](#)

3rd Semester (Pursuing)

Bachelor of Computer Applications (BCA) – (2022– 2025) [Maa Shakumbhari University, Saharanpur, UP](#)

Class XII — CBSE [Spring Bells School, Saharanpur, UP](#)

ACHIEVEMENTS & ACTIVITIES

- AWS Certified Cloud Practitioner with hands-on experience in AWS, Docker, Kubernetes, Terraform, and CI/CD pipelines.
- Strong understanding of Linux, networking, infrastructure automation, and DevOps workflows.
